

**CORRECTIONS TO
“LOW-DIMENSIONAL FACTORS OF SUPERELLIPTIC
JACOBIANS”**

THOMAS OCCHIPINTI AND DOUGLAS ULMER

There are two typographical errors in Section 2 of [OU15].

- (1) In the second paragraph of the section, just after the displayed equation, V_j should be defined as “the subspace where ζ acts by multiplication by ζ^{-j} .”
- (2) The last sentence of the section should read “It follows that if $d > n$ and $j < d/n \leq d/(e \max\{e_i\})$, then $\dim V_j = 0$, and this is exactly the assertion of the proposition.”
